Mr. Bill Cavaliere, Sr. CEO  
LifeBack Enterprises, Inc.  
301 E. Lemon Street  
Suite A  
Tarpon Springs, Fl 34689

Dear Mr. Cavaliere:

The purpose of this letter is to provide you with a status report of our ongoing study of your back support belt. We have included in this report an analysis of all the reports received from workers and employers who are using the LifeBack Enterprises, Inc. support belt.

Executive Summary

In January 2007, the USF OSHA Training Institute Education Center (OTI Ed Center) in conjunction with LifeBack Enterprises, Inc. began to organize a study of workers who were using the LifeBack support belt. The purpose of the study was to determine if the belt helped reduce back pain in workers who were doing work that could strain their lower back. Our results show that 100% of the workers who wore the belt for 60 days or more reported an improvement in their back pain and the majority of cases reported they had no back pain.
